

# TRAN NGUYEN LINH

## INTERN IT NETWORK ADMINISTRATOR

**Address:** 19 Nguyen Huu Tho, Ward Tan Phong, District 7, Ho Chi Minh City

**Phone:** 0397228934

**Email:** trannguyenlinh.222@gmail.com

## INTRODUCTION

---

As a final-year student at Ton Duc Thang University, specializing in Computer Networks and Data Communication, I have developed a strong interest in Information Technology, especially in Network system administration. I have experience in data collection, analysis, and teamwork, and I am familiar with tools like Figma, Canva, and Drawio for creating sketches, wireframes, mockups, and prototypes for website design. I am eager to learn and grow in diverse, multi-functional environments. With my communication skills and a collaborative spirit, I hope to contribute positively to your company.

## EDUCATION

---

**Ton Duc Thang University**

**2020 - present**

- **Major:** Computer Networks and Data Communications, Faculty of Information Technology
- **Subject:** Requirements analysis and design, User interface design, Mobile application development.

## ADDITIONAL INFORMATION

---

- **Main skills:** I am skilled in using tools such as Figma, Canva, and Drawio to create storyboards, sketches, wireframes, mockups, and prototypes for designing and building UI/UX for websites. My proficiency ranges from basic to advanced levels with these tools. Additionally, I have experience in surveying, analyzing, and testing software, as well as designing business systems using these tools.
- **Soft Skills:** Teamwork, communication, flexible problem solving..
- **Certifications:** Aptis ESOL

## PROJECTS

---

### WEBSITE INTERFACE DESIGN FOR ONLINE BUS TICKETS

**August 2023 - November 2023**

- **Role:** Come up with ideas for scenarios to reach users, survey, collect and analyze information about users' actual needs. From there, use the Canva tool to draw storyboards and User Portraits. Use Figma to draw Wireframe, Mockup, Prototype to design UX/UI for online bus ticket booking website..
- **Technology:** Figma, Canva, Drawio.
- **Description:** The topic "Designing an Online Bus Ticket Booking Website Interface" aims to create a user-friendly platform for easy bus ticket search, comparison, and booking. Key features include route search by departure, destination, and date; ticket price and service comparison; multiple payment options; and ticket management with options to cancel or change bookings. The site will feature map integration for station locations and travel routes. Designed in a modern, harmonious style, the interface will be mobile-friendly, ensuring users can book tickets anytime, anywhere.
